

## Corrections to the ERG2008

1) **IMPORTANT:** A printing error has been reported that appears in a limited number of copies of the **English version** of the ERG2008 books. The error is that the first part of the blue section in the alphabetical listing from pages 97 to 128 has been duplicated and therefore appears twice. The alphabetical blue section that normally follows is missing (pages 129 to 160). Please verify your copy of the ERG2008 for accuracy and report any errors to CANUTEC at [canutec@tc.gc.ca](mailto:canutec@tc.gc.ca).

2) **ERRATA on page 16 of all three versions (English, French and Spanish)**, the drawing for the Class 2.3 placards has been modified. The new placard for Ammonia, anhydrous (UN1005) should be displayed separately and refer to GUIDE 125.

3) **ERRATA on page 144 of the English version.** Please correct the entry on page 144 (fourth item) for "Petrol and ethanol mixture, with more than 10% ethanol". The ID No. in the Guidebook is written as 347. The correct ID No. should be **3475** and not 347. This error is **only present** in the english version of the Guidebook.
